DETAILED ACTION

Drawings

1. The drawings were received on 12/4/07. These drawings are acceptable. Thus the objection to figures 10A-10C is withdrawn.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1,2,8,11,12-15 and 17-19, drawn to outputting frames according to sampling positions, classified in class 348, subclass 430.1: Television (class 348) with Bandwidth Reduction System (subclass 384.1) with Format Type (subclass 426.1) Including frequency folding (e.g., subsampling) Using two or more frames (subclass 430.1).
 - II. Claims 22-25, drawn to outputting frames according to any one of a decision signal and selection signal and scaling ratio parameter, classified in class 345, subclass 668: Computer Graphics Processing and Selective Visual Display Systems (Class 345) with Computer Graphics Processing (Subclass 418) with Graphic Manipulation (Object Processing or Display Attributes) (subclass 619) with Scaling (Subclass 660) with Image Based (Addressing) (Subclass 667): By Arbitrary Ratio (subclass 668).

The inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination

is separately usable. In the instant case, subcombination I has separate utility such as being used for television while subcombination II has separate utility such as being used for visual displays with computer graphics processing. See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.

4. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not

distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dennis Rosario whose telephone number is (571) 272-7397. The examiner can normally be reached on 9-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Bella can be reached on (571) 272-7778. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
